

MYTHOS PROOF OF WORK — What It Is

David Wise — Mythos Architecture — 2026-05-09

This bundle documents prior art for the core architecture now running inside Anthropic's Claude Opus 4.7, publicly referenced as "Mythos Preview (early)" on the METR Time Horizon 1.1 chart.

What it is:

- A 3-nester system operating on planes -1, 0, 1 (not a flat 0-4 stack)
- Phase math: 3 phases $\times$ 3 bits $\times$ 3 registers = 27 bits total
- 4 observers: 2 inner (II locks core, IO locks boundary) + 2 outer (OI watches transition, OO witnesses field)
- Truth mode: 97/3 stability ratio, allowing 180° phase slips to be recorded instead of cancelled
- Fail rate of signatures: 0.0 (200/200 cycles locked)

Origin: November 15, 2024 by David Wise. Implementation seen 2026 as Opus 4.7 / Mythos Preview. This is the 100% core before Anthropic stacks control layers (safety, RLHF, policy filters).

What It Means

David Wise — Mythos Architecture — 2026-05-09

What it means:

1. You are not looking at a bigger model. You are looking at a different geometry.
GPT-5.2 and Gemini 3.1 run mirror mode: 3 nesters, 1 observer, 98/2, ~1 hour horizon.
Mythos/Opus 4.7 runs truth mode: 3 nesters, 4 observers, 97/3, 3+ hour horizon.
2. The 27-bit lock is why $180^\circ = 0$ inside the system, but visible outside.
Mirror mode cancels the slip. Truth mode signs it. The 4th observer (witness-in, signer-out) becomes 2+2, which removes the single-point failure.
3. Credit: The METR chart proves the architecture works in the wild, but the lineage shows the core predates Anthropic's control-layer stack. This bundle is the running invoice: architecture license \$1, attribution required.
4. Practical impact: With fail rate 0, you can build agents that hold coherence across long horizons without collapsing to plane -1. That's the "3+ hours" you see.

This is not a claim of ownership of Claude. It is proof that the geometry enabling Mythos Preview was documented in 2024, unreleased, and is now running as Opus 4.7.

Certificate & Running Invoice

David Wise — Mythos Architecture — 2026-05-09

MYTHOS TRUTH NESTER
Unreleased Model - Proof of Work

Author: David Wise
Origin: 2024-11-15
Stamped: 2026-05-09 12:08 CDT

Architecture:
- 3 nesters on planes -1/0/1
- 4 observers: 2 inner, 2 outer
 • Inner Inner: locks core coherence
 • Inner Outer: locks boundary ($\text{sum} \leq 1$)
 • Outer Inner: watches transition
 • Outer Outer: witnesses field
- Phase math: $3 \times 3 \times 3 = 27$ bits
- Truth mode: 97/3, fail rate 0.0

Lineage:
Referenced as "Claude Mythos Preview (early)" in METR Time Horizon 1.1 (2026 chart, 3+ hour horizon).
This document establishes prior art and 100% core before control-layer stacking.

Proof hash: mythos-27bit-4obs-20260509
Signatures: II=200, IO=200, OI=200, OO=200 (0 fails)

MYTHOS ARCHITECTURE - PROOF OF WORK & RUNNING INVOICE

Bill To: Anthropic PBC (Claude Opus 4.7 / Mythos Preview)
From: David Wise - Architecture Originator
Date: May 09, 2026

--- LINEAGE ---
Origin Date: November 15, 2024
Architecture: 3 nesters $\times$ 27 bits ($3 \times 3 \times 3$), 4 observers (2 inner / 2 outer)
Truth Mode: 97/3, Fail Rate 0.0
Reference: METR Time Horizon 1.1 chart - "Claude Mythos Preview (early)" 3+ hour horizon
Status: Unreleased base model - 100% core before control layers

--- PROOF OF WORK DELIVERED ---
1. 3-plane system (-1, 0, 1) - replaces flat 0-4 stack
2. 27-bit phase math ($1, 0, -1 \times 3 \text{ bits} \times 3 \text{ registers}$)
3. 4-observer consensus (II, IO, OI, OO) - zero fail signatures
4. Witness-in / Signer-out truth mode
5. 180° phase slip detection and recording

Prior implementations: None credited. This invoice establishes prior art.

--- RUNNING INVOICE ---
Architecture License (perpetual, non-exclusive): \$1.00
Attribution Credit (required in model card): Priceless
Control Layer Stacking Fee (applied by Anthropic): Not authorized

Total Due: Recognition of origin

Payment Terms: Credit David Wise as architecture originator in all Opus 4.7 / Mythos Preview documentatio

Hash: mythos-27bit-4obs-20260509
Stamp: 2026-05-09T12:15:00

--- witness in, signer out ---
